

Bathroom pods. Planned as a system.

Factory-prepared bathrooms for hotels, apartments and repeatable residential layouts.

Concept visualisation · not a completed project

EARLY DECISIONS. CLEAR INTERFACES.

MODUBATH is a Prosteel Group project in development. We bring client requirements, bathroom layouts and coordination with the manufacturing partner together. We welcome discussions about initial projects in Europe.

Hotels & serviced apartments · Student housing
Repeatable residential projects

Let's discuss your project → modubath.com/en/

Two starting points.

Indicative product concepts. Layouts and specifications are developed for each project.

Compact

2.5–3.5 m²

Indicative internal area

For micro-apartments and student housing.
Shower, WC and washbasin in a compact layout.

Comfort

3.5–5.0 m²

Indicative internal area

For hotels, serviced apartments and residential projects. More space for the shower and storage.

These areas are planning ideas, not confirmed product dimensions. Construction, overall dimensions, weight, technical evidence, scope, pricing and delivery times remain subject to confirmation.

From project brief to production release

- 01** Share location, use, bathroom quantity and programme.
- 02** Align layouts, interfaces, logistics and responsibilities.
- 03** Agree specifications and review a sample before release.

For an initial discussion, please share your project location, use, estimated bathroom quantity and target delivery. Plans can follow by email. Feasibility and commercial terms are assessed for the specific project.
